## Summary

Motivated and enthusiastic Computer Science Engineering student at Loyola-ICAM College of Engineering and Technology, seeking opportunities to apply technical knowledge and problem-solving skills in software development and innovative technology projects. Eager to contribute to organizational growth while enhancing professional expertise.

## Experiences

**AI Web Development Intern, InAmigos Foundation**

06/2026 – 06/2026

Remote, Tamil Nadu

- Built and maintained a personal portfolio website to showcase projects and technical skills.
- Assisted in improving website user interface, performance, and functionality.
- Researched AI-powered web development tools and suggested practical implementations.
- Supported web development tasks using HTML, CSS, JavaScript, and GitHub.
- Collaborated with team members to solve technical issues and enhance website features.

## Education

**Bachelor Of Engineering, Loyola-Icam College Of Engineering And Technology**

07/2024 – 05/2028

Chennai, Tamilnadu

## Skills

**Programming In C And Python**

**Web Development**

HTML, CSS, JavaScript

**Database Management Using MySQL**

## Language

• Tamil

• English

## Hobbies

**Learning New Technologies**

**Web Development**

**Participating in Hackathons**

## Certificate

---

- Ctrl Alt Hack Hackathon
- Database Programming with PLSQL
- AI Web Development Internship Certificate
- Database Programming with SQL

## Projects

---

**Automated Fish Feeding System,** *Technologies Used: Arduino UNO, Servo Motor, Embedded C, Sensors*

- Developed an automated fish feeding system as a team project.
- Designed a mechanism to dispense food automatically at scheduled intervals.
- Improved feeding efficiency and reduced manual intervention through automation.

**E-Waste Management Website,** *Technologies Used: HTML, CSS, JavaScript, MySQL*

- Developed a website to promote responsible e-waste recycling and awareness.
- Created user-friendly interfaces for users to learn about and manage e-waste disposal.
- Designed responsive web pages and integrated database functionality.

**Stock Market Analyzer,** *Technologies Used: Python, Pandas, NumPy, Matplotlib*

- Built a stock market analysis tool to study market trends and performance.
- Processed and analyzed stock data using Python libraries.
- Generated visualizations and insights to support investment decision-making.
